

Inter-Office Memorandum

To	Distributed Computing	Date	April 16, 1980
		Updated	December 22, 1980
From	Glenn Krasner updated by Tim Diebert (CSL)	Location	Palo Alto
Subject	Tape Server Software	Organization	PARC/SSL

XEROX

Filed on: [IVY]<TapeServer>Docs>TapeServerSoftwareOverview.memo ,press

This document is an overview of the files involved in the magnetic tape server software. Send all comments, questions or suggestions to Krasner.PA.

File	Description
TapeServerSoftwareOverview.press	This document, an overall description
TapeServerSoftware.press	Describes the tape server code
TapeServerProtocol.press	Describes the tape server protocol
TapeServer.run	Run file for server
TSP.decl	BCPL declarations and constants for the server
TapeServer.bcpl	Main body of BCPL code for server
TSPDOs.bcpl	Command subroutines for server
TapeIO.br	From the TapePackage
TapeTfsSwat.br	From the TapePackage
TapeMicrocodeXM.br	From the TapePackage
TapesOverview.press	Overview of tape controller software and hardware
<Pup package>	BCPL BSP pup interface software in various files

The various document files live on [IVY]<TapeServer>Docs>, the run program lives on [IVY]<TapeServer>Software>TapeServer.run, the Tape Server Source files live on [IVY]<TapeServer>SoftwareSources>TapeServerSources.dm, the TapePackage, (including microcode BRs) lives on [IVY]<AltoTape>1600Bpi>Software>TapePackage.dm, and the Pup package lives on [MAXC]<Alto>PupPackage.dm. All other required software or microcode comes from the proper [MAXC]<Alto> file.
